# AOI ELECTRICAL SIDE CURTAIN AIRBAG ON/OFF SWITCH

Use rigid wing partition filler panels without the worry of them shattering from side curtain airbag deploys

Our patented Side Curtain Airbags On/Off Control Switches provide officers the solution to perform without the threat of damage to themselves and vehicles when their airbag is deployed. The side curtain switch protects after-market mounted equipment and uses rigid wing partition filler panels.

## Side Curtain On/Off Switch Features

- ▶ Highly visible, LED telltale light clearly indicates if airbag protection is turned on
- ▶ The small profile box fits easily under the dash or other confined spaces
- ▶ Key operated switches can be turned off to protect equipment mounted in the airbag deployment zone or on to protect a passenger seated behind the airbag
- ▶ Each switch is tested to 100,000 cycles to ensure quality and reliability
- ▶ Most municipal insurance plans compensate for airbag deactivation switches
- ▶ NHTSA allows vehicles used in emergency situations to install frontal airbag deactivation switches
